Writing Paragraphs

PRACTICE TIME

1. My favourite time of the day is evening. As this is the time when the sun is setting and the air is cooling down. At this time, I either go for a stroll, play some games or sit quietly watching the activities around me. The compound, surrounding my house is a large one. My father has planted many trees in it. Birds come to the trees to sing their songs. I listen to these lovely songs. My parents sometimes ask me to mow the lawn or help them with some gardening tasks. In the evening the sun is soft and gentle, so it is pleasant to potter around the garden then.
2. Earth is our home and it is the only planet that can support human life. It has limited

resources and we need to conserve them so that future generations can enjoy them. Protecting our planet not only involves planting more trees to combat the effects of pollution and global warming prevention but also involve adopting sustainable living habits. Eco-Friendly practices, such as recycling, reducing waste, and using renewable energy sources, play an instrumental role. Let's work together to make our earth a healthy planet for our future generations.

3. One of the biggest surprises I have ever experienced was when my family surprised me at the middle of the night. I was calmly sleeping on my bed, suddenly they all came and started wishing me "Happy birthday" and I was shocked, surprised and very happy. Then I cut the cake and received many gifts from them, especially a bicycle. It is the best gift, I have received so far. That surprise made my day and it will always be cherished in my heart.

Debate**

PRACTICE TIME

1. Salutation

Respected judges and my worthy opponents. Today I am here to throw light on the topic "Are celebs responsible for the products they endorse."

Introduction regarding topic— The main role of an ambassador is to create awareness among the customers, regarding a particular product. They should not mislead a consumer with wrong facts and figures. They must accept the role of an ambassador only after conducting a careful research. If not a research, they should at least try the product on themselves before endorsing it. They should find out every thing about the product to save people from being misled.

Solution— There must be some monitoring and legal regulation on the part of celebrities before signing any advertising contract.

Conclusion— Apart from celebrities, manufactures and company of the product should also be held liable for the product. Thank you everyone, have a nice day.

2. Salutation— Honourable judges, principal sir, teachers, my dear friends and worthy opponents. Good morning to you all. I, Akash Agrawal stand before you to express my views on topic "Homes for the aged is a necessity in India."

Introduction regarding topic— Old age homes are boon for the senior citizens who don't have any support due to various reasons. These old age homes prove to be a better option where old people can meet others of the same age. When these old people are left alone in the houses or when their children are away from home that can cause stress and depression. This can give rise to loneliness. Companionship is also important, especially for those who have lost their spouses. Today in modern society the number of children who care for their parents is becoming lower and lower so the importance of old age homes is becoming important in our modern society.

Solution— Special organisations should be set up to look after them and their desires. Government should also participate and help in this.

Conclusion— Our elders are our heritage. It's our foremost duty to take care of them. Thank you everyone for giving your precious time.

2. Adopted village as social responsibility

— By Kiran

On the occasion of World Literacy Day, St. Paul School, Shimla has taken an oath to adopt the village named Rampur. The school has taken the responsibility of educating the people residing in the village. Some students including me, are taken there every weekend, during school hours to impart knowledge to them. The immense enthusiasm and zeal in the people to learn is the main driving factor. A family kind of environment is being created. By adopting a village, the school is making its students sensitive towards the need of the environment at a young age.
